

Jose Luis Garcia

📍 Amsterdam, NL ✉ joselgc1@gmail.com ☎ +31625406099 in jose-l-garcía-2805 🌐 Joselgc1

AI Engineer and Master's student in Artificial Intelligence at the University of Amsterdam, with 4+ years of experience delivering **LLM integrations**, **agentic workflows**, **RAG pipelines**, and **full-stack solutions** across frontend, backend, and AI layers for international organizations serving 100k+ users across 15+ countries. Looking for an AI engineering role in the Netherlands where I can build reliable, production-ready systems that deliver measurable impact.

Experience

Amsterdam UMC, Radiotherapy Department, AI Research Intern
Healthcare | Academic Medical Center

Amsterdam, NL
Jan 2026 – Jun 2026

Master's thesis research on topology-aware deep learning for medical image segmentation, conducted within the Radiotherapy Department.

- Developing a **topology-aware segmentation** method for small-bowel detection in 3D MRI, extending a stochastic centerline tracking framework with **LSTM-based contextual patch modeling** (Python, PyTorch, VNet, LSTMs, DICOM, HDF5, TotalSegmentator, NumPy).
- **Designing and evaluating end-to-end ML pipelines** on private cine-MRI clinical data, focusing on structural correctness, connectivity, and anatomical plausibility.

Relief Applications, AI & Full-Stack Developer
Non-Profit / International Development | Software Consultancy

Madrid, Spain (Remote)
Jul 2025 - Present

- Contribute to production web platforms used by **WHO, UNESCO WHC, UNESCO MAB, and ILO**, serving **100k+ users** across 15+ countries (Angular, TypeScript, Django, Node.js, PostgreSQL, MongoDB, GraphQL, Docker, Keycloak).
- Independently designed **agentic developer workflows** using **Claude Code** and **OpenCode**, including **custom agents, commands, skills, and MCP integrations**, significantly improving productivity across five concurrent projects.

El Tiempo Latino, AI Engineer & Full-Stack Developer
Media | Digital News Publishing

Washington, USA (Remote)
Jun 2023 – Sept 2024

Part of a small R&D team building AI-powered tools to modernize content production for a US-based Spanish-language news outlet.

- Built and deployed an **LLM-powered application** on **Azure**, integrating **OpenAI's API** and **fine-tuning models** to match editorial style, **automating article generation** end-to-end via the WordPress API (Python, PostgreSQL, Beehiiv).
- Designed an **automated content pipeline** processing real-time news feeds (Bing News API, RSS) through an **LLM workflow** for translation, rewriting, and publishing (Google Analytics, Google Search Console).

NC Autopartes, Full-Stack Developer & IT Team Leader
Retail / E-Commerce | Automotive Parts

Caracas, Venezuela
Feb 2022 – Jun 2024

- Sole IT resource across Venezuela, Peru, and Ecuador, leading **Odoo ERP** module development, managing **3 AWS servers**, and maintaining **PostgreSQL** production databases with high availability (Python, JavaScript, XML).
- Integrated WordPress e-commerce with Odoo ERP, driving an **80% increase in online sales** for 50+ staff users (WordPress, Odoo, AWS).

- Designed and trained a novel **3D CNN model for detection and segmentation** of pulmonary nodules and COVID-19 in thorax CT scans, owning the full pipeline from **data collection, model building to training and evaluation** (Python, Keras, TensorFlow, NumPy, 3D convolutional architectures).

Education

MSc	University of Amsterdam (UvA) , Artificial Intelligence	Sept 2024 – Jul 2026
	• GPA: 7.5/10.0 (Dutch scale) • Coursework: Computer Vision, Deep Learning, Foundation Models, NLP, AI for Medical Imaging, Information Retrieval, Reinforcement Learning, Responsible AI and more. • Projects: 1) Generalization study of TIGER-V1 (a generative Transformer recommendations system); 2) AI-generated text detection via Fast-DetectGPT; 3) 3D semantic segmentation with Gaussian Grouping and SAM (G²S³). • Publications: 1) LLM multi-agent negotiation study (arXiv:2502.16242); 2) AI-generated image detection via semantically aligned images (ICCVWorkshop, 2025). • Thesis: See Experience section.	
BS	Simón Bolívar University (USB) , Electronics Engineering	Apr 2016 – Jul 2022
	• GPA: 4.35/5.0	

Certificates

- **Deeplearning.ai:** Building Multimodal Search and RAG, Finetuning Large Language Models, LangChain for LLM Application Development, Deep Learning Specialization, NLP Specialization
- **Anthropic:** Model Context Protocol (Intro + Advanced), Agent Skills and Subagents, Claude Code 101 and in Action

Languages

- **Spanish** - Native
- **English** - C2 (TOEFL iBT 2023: 116 / 120)

Technical Skills

- **Programming:** Python, JavaScript, TypeScript, SQL
- **AI / ML:** PyTorch, TensorFlow, Keras, OpenCV, Scipy, **LangChain**, **OpenAI API**, **Anthropic API**, **RAG pipelines**, **LLM fine-tuning**, **prompt engineering**, **LLMOps**, **MCP**, NumPy, Pandas.
- **Data Engineering:** PostgreSQL, MongoDB, Redis, ETL pipelines, Amazon S3, Apache Parquet
- **Frameworks:** Django, Flask, Node.js / Express, Angular, GraphQL, REST APIs
- **Infrastructure:** Docker, Git, Microsoft Azure, AWS, Keycloak (OAuth 2.0 / OIDC), Celery
