I'm an Electronics Engineer currently pursuing a Master's in Artificial Intelligence at the University of Amsterdam, with over three years of professional experience. I'm deeply passionate about AI and its potential to improve lives. I thrive on tackling challenging projects and finding creative solutions. I adapt quickly, learn fast, and feel equally comfortable solving problems independently or collaborating within a team.

## Experience

### Alumbra / ToraxAI, Undergraduate Thesis Internship

Caracas, Venezuela

Feb 2021 – Jan 2022

- Designed and implemented a novel 3D Convolutional Neural Network model using Python and Keras to analyze thorax CT scans for the detection of critical respiratory pathologies, including pulmonary nodules and COVID-19.
- Led the complete machine learning pipeline: data collection, preprocessing, model development and training, and final evaluation.

### Relief Applications, Full-Stack Developer & Independent Consultant

Madrid, Spain (Remote)

July 2025 (Current)

- Developing digital solutions for United Nations organizations, including the World Health Organization (WHO), UNESCO World Heritage Centre (WHC), and the International Labour Organization (ILO).

### El Tiempo Latino, Full-Stack Developer & Data Analyst

Washington, USA (Remote)

June 2023 – Sept 2024

- Led development of a Flask-based web app on Microsoft Azure, integrating AI into daily workflows to make El Tiempo Latino the first US-based Spanish-language outlet with a Latin American target audience to adopt AI for content creation.
- Built PostgreSQL databases and dynamic dashboards to deliver trend and performance analyses, providing actionable real-time insights for editorial and technical teams.

### NC Autopartes, Full-Stack Developer & IT Team Leader

Caracas, Venezuela

Feb 2022 – June 2024

- Led Odoo ERP module development (Python, XML, JavaScript) and managed AWS servers for operations in Venezuela, Peru, and Ecuador. Resolved technical incidents promptly, maintaining continuity across offices and warehouses.
- Managed and optimized WordPress e-commerce sites, integrating them with Odoo ERP.
- Ensured PostgreSQL database integrity, availability, and performance through regular maintenance and tuning.

### ClarityX, Freelance Developer

USA (Remote)

Jan 2023 – May 2023

- Designed and implemented a Python-based ETL pipeline on Linux to automate ingestion of .parquet files from Amazon S3 into PostgreSQL.
